

HYTRON enters the stall. No other autonomous robot does.

SINGAPORE-ENGINEERED. READY FOR US DEPLOYMENT.

350+ qualified enterprise leads at CES 2026 from 23 countries. Now scaling to America.

20 Deployed in live commercial operations

>99.9% Bacterial reduction (FDA BAM methodology)

245+ Units committed across exclusive distributors

- \$33M university contract signed March 2026
- \$74.3M FY2025 revenue

- 500+ active facility contracts
- 35+ years operating history (since 1988)

HYTRON — Autonomous Restroom Sanitation Platform

Primech AI is the robotics division of Primech Holdings (NASDAQ: P MEC), a Singapore-headquartered company with 35 years of integrated facility services experience and 500+ institutional contracts. The same operating platform that deploys and services HYTRON globally is now scaling into the United States.

HYTRON is the only autonomous robot with a narrow form factor (400mm wide) designed specifically to enter toilet stalls. Powered by NVIDIA Jetson Orin edge AI, a 6DoF robotic arm, and SLAM navigation, it cleans approximately 40 fixtures per 4-hour cycle — fully autonomously, with no human intervention required.

400mm Stall-access width	4 hr Runtime + 30-min recharge	67 TOPS NVIDIA Jetson Orin AI	~40 Fixtures per cycle

VALIDATED & DEPLOYED TIMELINE

- APR 2026** Selected for SelectUSA Tech program. Mass production commenced Q2 2026. Active US enterprise discussions across hospitality, healthcare, transportation, higher ed, and commercial real estate.
- MAR 2026** \$33M University Contract — 45 HYTRON robots committed across 2 campus zones, deployment phased over 4-year contract term
- MAR 2026** CBM Partnership — HYTRON leasing agreement across CBM managed properties
- JAN 2026** CES 2026 TechRadar Pro Picks Award — Global robotics category
- JAN 2026** \$4M Strategic Investment from WELLE Environmental Group
- NOV 2025** Singapore NEA approval — Up to 50% government co-funding for HYTRON purchases under the Environmental Services Productivity Solutions Grant
- SEP 2025** >99.9% bacterial reduction validated by independent lab under FDA BAM methodology

WHY WE ARE AT SELECTUSA

Primech AI is establishing US operations to bring HYTRON to the largest commercial restroom market in the world.

- US Operations Hub** — Evaluating site locations for North American headquarters, technical support, and field operations
- Channel Distribution** — Active discussions with leading US facility services providers including national distributors and integrated FM platforms
- Pilot Deployment Partners** — Targeting universities, airports, casinos, stadiums, and Class A office portfolios for HYTRON pilot programs
- Strategic Partnerships** — Open to manufacturing, assembly, integration, and strategic partnerships that accelerate US scale

WHY HYTRON, WHY NOW

MARKET NEED

US commercial cleaning faces structural labor shortages, rising wage pressure, and elevated post-pandemic hygiene expectations. Restrooms are the highest-complaint, highest-liability surface in any commercial facility.

PRODUCT READINESS

HYTRON is deployed, validated, and award-winning. Not a prototype. 20 units operating in live commercial environments today, 245+ committed across exclusive distributors. Independently tested. CES 2026 recognized. Mass production active since Q2 2026. Ready to ship to US partners now.

PARTNERSHIP READY

Backed by a 35-year operating company with 500+ existing institutional facility contracts. We deploy, service, and scale autonomous robots at commercial scale today — not as a future promise.
